

Press Release Submission Services

Press Release Submission

We can not only create your press releases but we also can submit them to the most relevant locations online. These include Google News amongst others. Our press release submission service goes hand in glove with our online press release creation service. Press releases are a fantastic method of letting the world know about your latest offering, awards you have won, your new website or anything else you deem worthy of note. Remember the more interesting and newsworthy your press release is-the better the chances it will attract attention!
